Leggett & Platt Storage Products Group Ushers in the New Era™ of Shelving and Storage
Innovative Steel-Reinforced Plastic Shelves Support Up to 1,000 Pounds, Allow Easy Cleaning

COVINGTON, GA, August 7, 2006 – Leggett & Platt Storage Products Group introduces its latest line, International Storage Systems (ISS)-brand New Era™ Shelving System for support strength and easy cleaning.

New Era is ideal for any operation where shelving cleanliness is particularly important. This steel-reinforced shelf features a grey polypropylene plastic cover that can be easily removed from the frame, washed in the dishwasher and snapped back on without tools or hardware. In addition, all New Era shelves are coated with an antimicrobial epoxy to provide superior protection against corrosion and bacterial growth.

New Era can be used in all environments from 190°F to -20°F. Its removable panels are available in solid style, in order to prevent leaks from dripping onto other shelves, as well as vented style panels.

The New Era System is available in a variety of heights, lengths and widths; and as an added benefit, its shelves can be intermixed with other ISS shelving styles and can fit onto any standard ISS post.
