Foodservice operations optimize space with Leggett & Platt Storage Products' ISS Wall Trax™
Innovative, wall-mounted storage system frees space and improves efficiency in foodservice operations

CHICAGO, November 20, 2006 – Shrinking spaces, expanding menus and more visible kitchens are forcing modern foodservice operators to reexamine the layouts and storage practices employed in their kitchens. Leggett & Platt Storage Products Group helps foodservice operators optimize their use of space with ISS Wall Trax, a full line of highly adaptable, wall-mounted storage accessories designed to give today's foodservice operations a long-lasting, customizable storage solution for the food items and equipment used at all stages of the preparation process.

The ISS Wall Trax system is comprised of grids and aluminum tracks that accommodate a series of accessories including baskets, hooks and holders. The base system and accessories are fully adaptable to the specific needs of individual foodservice operations. ISS Wall Trax ensures the equipment that food prep workers need throughout the food preparation process is readily available when it is needed and neatly out of the way when it is not. Because of its modular design, ISS Wall Trax can be configured and reconfigured without the use of tools to accommodate the menu, space and personnel changes that impact the food preparation process.

Ron Murray, executive vice president of global business development for Leggett & Platt Storage Products, commented on the importance of space management in today's foodservice operations: "Space, especially in large metropolitan areas, is becoming more costly; menus, which are expanding to satisfy the public's evolving tastes, require ever more specialized equipment; and kitchens are increasingly facing greater public exposure as they move to the front of the house," remarked Murray. "More than ever, foodservice operators need solutions to make the best use of their space. Wall Trax accomplishes this easily by taking advantage of often-unused vertical spaces."

ISS Wall Trax is available in two finishes: Plating Plus and Gold Bond. To see the ISS Wall Trax shelving options and accessories catalog, foodservice operators can follow the link to Shelving Systems at www.leggettspg.com.
