**Universal Stainless Work Tables from Leggett & Platt Storage Products Group (SPG)
Contribute to Sanitary Foodservice Operations**

CHICAGO, January 15, 2007 – Durable, easy-to-maintain food preparation surfaces help to promote safe and sanitary foodservice operations. Through the use of top-quality materials, strict manufacturing tolerances and a host of customization options, Leggett & Platt Storage Products Group's (SPG) Universal Stainless Work Tables exemplify ideal kitchen work surfaces and help restaurants and other commercial foodservice operations maintain sanitary food preparation practices.

"Sanitary food preparation is a central concern for foodservice operators and patrons alike," said Ray Broussard, vice president of business development for Leggett & Platt Storage Products. "A proper work table helps minimize the risks of spreading food-borne pathogens through cross-contamination. By incorporating easy-to-clean stainless steel tops and utilizing a design that minimizes the amount of debris-trapping seams, for example, our stainless steel work tables simplify the task of maintaining a sanitary foodservice operation."

Leggett and Platt SPG's Universal Stainless Steel Work Tables feature an all-welded design that eliminates the need for assembly and, combined with optimally placed underbracing and sound-deadened tops, results in an exceptionally rigid surface with minimal deflection. The entire product line is available off the shelf in a wide variety of configurations, with or without under shelves and backsplashes and in several pairings of length and width ranging from 2' to 12' lengths and 24", 30" and 36" widths. The array of available sizes combined with a square-edge design ensures clean abutment to other equipment.

All Universal Stainless work tables are constructed with surfaces of Type 304 stainless steel and are available with legs and cross rails made from stainless steel or galvanized steel. The company's Standard Series tables feature work surfaces made from 16-gauge stainless steel, while its Spec Line series are topped with a thicker 14-gauge stainless steel.

About Leggett & Platt Storage Products Group

As part of a *Fortune 500* Company, Leggett & Platt Storage Products Group is a leading provider of comprehensive storage solutions and material handling equipment.
